***Election/Restrictions***

1. Upon reconsideration, elected claims 1-66, 124,-127 and 145-170 are further directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The species of figures 1-5 (tubular sleeve having an internal flange); the species of figure 12 (tubular sleeve having an external flange); the species of figures 7-11 (tubular sleeve without internal or external flange); and the species of figure 14, respectively.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Currently, there are no generic claims.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special

technical features for the following reasons: The special technical feature of the species of figures 1-5 is the "internal flange". The special technical feature of the species of the figure 12 is the "external flange". The special technical feature of the species of figures 7-11 is a sleeve without a flange. The special technical feature of the species of figure 14 is the resilient retaining rings.

3. It is noted that original claim 64 is missing. Applicants are required to renumber claims 65-170 as 64-169, respectively, in response to this action.
